

SFC 56 PORTABLE SIGNATURE AND FINGERPRINT IMAGING DEVICE

SFC 56 is designed to image handwriting, fingerprint, stamps and other evidence.

The high quality imaging platform is paired with analytical software which facilitates real-time comparison, measurement and annotation. An Android application and wireless data transfer make the SFC56 ultra portable and field ready.

KEY FEATURE:

- One button press to capture more than 40 images/min
- Produces measurement calibrated images with 1:1 magnification when viewed at 100%
- Image post processing features including overlay, inset, enhancements, measurement and annotation.
